
This list has been updated with an eye towards providing working links to actual dissertation texts. Permanent links available free of charge through university databases have been privileged; for-profit enterprises that sell dissertation manuscripts have been listed when universities do not provide for the electronic dissemination of these documents. Manuscripts that are not available by either of these means are nevertheless listed as we hope to provide the most complete coverage of dissertations in the field of CALL that is possible.

You will notice that the reference list style is somewhat different than what is suggested by APA. We decided upon a format that includes the name of the institution where the dissertation was completed such that a quick scan of the list reveals where people are studying CALL related themes—and which universities are field leaders in terms of freely distributing dissertations. If you notice that dissertations completed at your institution have not been included, please send us the references, so we can update this list with every issue.

We gratefully acknowledge the assistance of Natalia Ávila Reyes, Research Assistant at the University of California, Santa Barbara, Mónica Vidal, copyeditor, and Gerriet Janssen, Managing Editor of LLT, in updating this list for the February, 2013, issue.

2012

Prihatin, P. N. (2012). The computer integration into the EFL instruction in Indonesia: An analysis of two university instructors in integrating computer technology into EFL instruction to encourage students' language learning engagement. (Doctoral dissertation, Loyola University). Retrieveable from ProQuest Dissertations & Theses. (AAT 3527962)

Sandler, J. D. (2012). Learning and teaching the grammatical usage of vocabulary items in english as a second language. (Doctoral dissertation, The University of Pennsylvania). Retrieveable from ProQuest Dissertations & Theses. (AAT 3509475)
